**CHEMOTHERAPY**  
**IV DECALS**

**Dhremo ["Dream-Oh"] Therapy IV Decals** are apothecary inspired decorative adhesive decals with uplifting messages for chemotherapy infusion IV bags. As a healing reminder, they essentially re-label the infusion to empower pediatric cancer patients to envision their treatments as powerful elixirs of healing and strength.

**Dhremo Therapy Kids** is our pediatric line designed specifically for young cancer warriors. As a powerful visual and mental aid, **Dhremo lowers fear and aversion to chemotherapy**, and helps children (and caretakers) re-frame the experience focusing on positive, healing and empowering thoughts during treatment.

**DIRECTIONS**

The decals have a peel away backing and can be placed directly onto the back of IV drip bags, as to not cover any of the key patient and drug information on the front.

**WHY DHREMO**

As a mom, artist and now cancer survivor, I created Dhremo Therapy IV Decals during my own treatment, so I could mentally embrace rather than resist chemotherapy.

Now in remission, I'm on a mission to help others shift their minds during treatment, including our bravest, youngest warriors. These decals have been designed with the input of oncologists, child life specialists, art therapists, oncology nurses, survivors and of course pediatric patients and parents.

**Marsha Hammond**  
 Founder / Creator / Survivor

**A GREATER MISSION**

For each package sold 10% is donated to cancer support centers and cancer research organizations who continue to help so many.

**6 UNIQUE DESIGNS**

1. Bravery Elixir
2. Wishing Well Tonic
3. Strength Activating Serum
4. Sunshine Sparkles
5. Rainbow Cure Blaster
6. Design - it - Yourself
