 CHEMOTHERAPY
 IV DECALS

HOSPITAL KITS

Dhremo ["Dream-Oh"] Therapy IV Decals are apothecary inspired decorative adhesive decals with uplifting messages for chemotherapy infusion IV bags. As a healing reminder, they essentially re-label the infusion to empower cancer patients to envision their treatments as powerful elixirs of healing and strength.

Hospitals can now purchase Dhremo Hospital Kits directly. Kits are either original apothecary style (shown here) or Pediatric (circus themed). Along with a bulk amount of decals the kits come with laminated decal menu for patients to chose their decal. All kits include design-it yourself decals for patients to create their own empowering "solution".

DIRECTIONS

The decals have a peel away backing and can be placed directly onto the back of IV drip bags, as to not cover any of the key patient and drug information on the front. Full pharmacy approved directions are included in all kits.

WHY DHREMO

As a mom, artist and now cancer survivor, I created Dhremo Therapy IV Decals during my own treatment, so I could mentally embrace rather than resist chemotherapy.

Now in remission, I'm on a mission to help others shift their minds during treatment. These decals have been designed with the input of oncologists, child life specialists, art therapists, oncology nurses, survivors and of course patients and caretakers.

A GREATER MISSION

For each package sold 10% is donated to cancer support centers and cancer research organizations who continue to help so many.
